

SOVAB, Renault Group subsidiary chooses HR Access.

SOVAB, a Renault group subsidiary, has chosen HR Access, the international software publisher and Human Resources Management service provider, **for its HR Access Outsourcing services.**

Paris, March 18th 2008

SOVAB (Société des Véhicules de Batilly), based in Lorraine since its creation in 1980, employs almost 2,500 staff. A **wholly-owned subsidiary of the Renault group**, it assembles two utility vehicles, the Master and Master Propulsion vans. Its cooperation agreement with General Motors and the Renault-Nissan Alliance also allows it to produce vehicles for both these manufacturers.

SOVAB was looking first and foremost for a real commitment to results in terms of both projects and service provision and wanted to be able to rely on a single point of contact right across the range of services (publishing, integration and facilities management). As a result **it has chosen HR Access Outsourcing – the new outsourced payroll and HR service offering from HR Access.** SOVAB has ensured it now has access to high-quality services, a scalable solution (in line with the company's growth and strategic direction) and a relationship based on trust.

For HR Access, which has **35 years' experience in human resources management** for medium-sized and large companies, this renewed partnership strengthens its position as a leader in the industrial sector and confirms its ability to support its clients across the full range of outsourced payroll and HR management services.

Numerous clients in the **industrial sector** have already put their faith in HR Access, including Air Liquide, PSA Group and Gallina Blanca (Spain).
